

LiftWise 3500 Series Tire Handler

The LiftWise 3500 Series Tire Handler can mount tires ranging in size from 48" up to 86" in diameter and weighing up to 3,500 pounds. Various models are available that accommodate tire widths up to 32". The tire can be safely transported using the maneuverability and familiar controls of a pallet truck. The tire then can be precisely positioned onto the truck by one person using the lift, side-shift and rotation functions on the hand-held, tethered controller.

Several optional tire racks are available. They can store up to 4 tires and be loaded using either a forklift or the tire handler.
