

SideWinder Tire Handler

The SideWinder has the ability to lift tires from a horizontal surface, such as a pallet, rotate them to vertical and then install the tire onto the axle. This below the hook design combines the functions of a tilt table and tire handler into one compact piece of equipment that has a minimal footprint.

The tire handler is controlled by a hand-held remote, has continuous, bi-directional rotation and an on-board power supply.

Specifications

Part #.....69670
Capacity.....up to 2,200 lbs.
Max. Tire Diameter.....76”
Min. Tire Diameter.....58”
Max. Tire Width.....35”
